

» Fleetmanagement und Communication

- Integrated solutions instead of isolated applications
- Vehicles and helicopters in one overview
- Using HeliMap™ all mobile units can see the position of all other parties
- Connection via GSM for ground staff and Iridium for aircrafts
- One central server is in control of collecting and sharing information
- Access from any internet pc
- Use of well known infrastructure and technologies
- Even any other station can operate as mission control
- Peripheral mission control, also from the helicopter
- Flight Following for night flight and NVG mission
- Relief of pilots: Mission control can send waypoints to the HeliMap system
- Daylight-, nightflight- and NVG capable displays
